

## Instructions for the November 18, 2020 Lecture

What's up Gang? All right so the papers are going up tonight, you'll load them up on Canvas onto something called Turnitin. I'll check out your papers this weekend, make any adjustments (which you'll be able to see by clicking on the little bubbles throughout the paper), and then you've got a few weeks to fix everything and then put it up one more time on December 9<sup>th</sup>, our last night. Remember, your final paper grade will go *down* if you don't fix everything so make sure you do. OK folks, tonight we'll look a little closer at the concept of security, and see how resources (especially fossil fuels) seem to be connected to security. Here's your night:

### Lecture 13. Security Theory and Peak Oil

**Task 1:** Read these instructions (easier every time).

**Task 2:** Read text "New U.S. Record-Level Oil Production! Peak Oil Theory Disproven! Not" by Richard Heinberg. Peak oil theories have been around for a while...is it time to retire or revive them?

**Task 3:** Watch the lecture presentation on "Security Theory and Peak Oil." How much of this boredom can you take?!

**Task 4:** Read the article for your journal response "World Watch: Peak Oil Forum." You can find the question on the link titled "Lecture / Discussion Page" highlighted in yellow. After completing the response, you will have until the date posted on the assignments page on Canvas to upload.

**Task 5:** Open the link for the video and watch *Oil, Smoke, and Mirrors*. Still believing the official 9-11 story? Maybe not after this documentary. *Very* controversial...watch with an open mind.

**Task 6:** Click the link titled "Discussion Board Question and Peer Responses for Video Presentation" and answer the question that I have posted in approximately one paragraph or so. Wait for other students to put their responses and then pick two students to respond to. The deadline for these responses will be posted on the Canvas assignments page. Don't be late....

**\*\*\*\*\*RESEARCH PAPER TURN IN TONIGHT ON CANVAS TURNITIN.COM\*\*\*\*\***

People! We've only got 3 more lectures! That wasn't so bad, was it? OK, maybe it was, but I'm proud of each and every one of you for hanging in there.

Enjoy this weekend, and we'll begin winding things down next week. Kropf
