

Instructions for Lecture Twelve

Welcome back POLI Siers!

Time to get started on Part 3, the last section of the semester. From here forward we'll be examining political economy and policy. Our main focus will be how and why states intervene in the market economy. What is the relationship between economic policies of the state and how it reflects the relative power of different groups in society. How important is the phenomenon of globalization in determining the economic policies of individual countries? Western wealthy countries are losing their domination of the commanding heights of the economy. What will that mean for us?
