

## Instructions for Lecture Fourteen

Good Evening Everyone!

Our last lecture from the Orvis/Drogus textbook will look at the phenomenon of what political economists describe as “market failure.” Market failure, as these economists describe it, will likely mean more state intervention in the economy in the social, health, and environmental realms. How will this intervention manifest itself in different types of government? Why are good health policy outcomes in the United States, compared with other western industrial democracies, so difficult to achieve? One more lecture folks and we are D.U.N. DUN!

### Lecture 14. Public Policies When Markets Fail: Welfare, Health, and the Environment

**Task 1:** Read these instructions! (so close...).

**Task 2:** Read Chapter 8 in the Weatherby text (pp. 309 – 370)

**Task 3:** Watch the lecture presentation on “Public Policies When Markets Fail.”

**Task 4:** Read the article for your journal response. You can find the question on the link titled “Lecture / Discussion Page” highlighted in yellow. After completing the response, you will have until the date posted on the assignments page to upload it to Canvas.

**Task 5:** Open the link for the video and watch.

**Task 6:** Go to our Canvas page and click the link titled “Discussion Board for Lecture One” and answer the question that I have posted in approximately one to two-paragraphs. Wait for other students to put their responses and then pick two students to respond to. The deadline for these responses will be posted on the Canvas assignments page. Don’t be late....

I’m either there or almost there on the papers, so be ready to fix anything that I pointed out with the Quickmarks on Turnitin. Let me know if you have any final questions as we get ready to wrap things up...

Whew, almost over,

Kropf
